TTi POLY TANKS

VS

STEEL TANKS

SAFETY

✓ No Surge, equipped with the LiquidLocker Baffle System

✗ Compartmentalized design still prone to liquid surge, which can affect vehicle stability

STRENGTH

✓ Handles chassis movement and twisting without cracking

✗ Lacks impact resistance, making it susceptible to cracks and damage. Prone to rust & cracking

SAVINGS

✓ Lower purchase cost, running cost savings as lighter design reduces fuel consumption and wear on the vehicle

✗ Higher purchase cost & higher long-term maintenance costs due to potential rust and damage repairs

ENVIRONMENTAL & LONGEVITY

✓ Proven durability with no reported failures over 25 years, reducing the need for replacements and minimizing waste

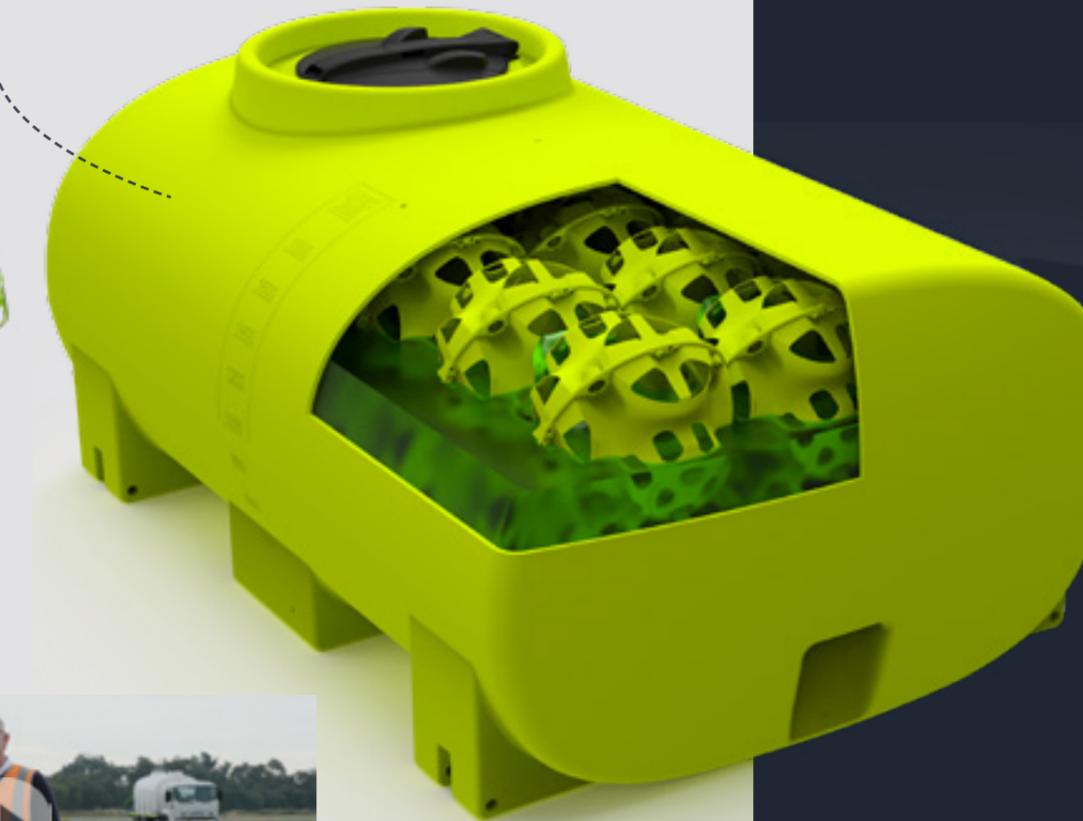

✗ Shorter lifespan, typically lasts 5-10 years, leading to more frequent replacements and higher environmental impact from manufacturing and disposal

BAFFLING SAFETY SYSTEM

The Locker that Stops The Slosh!

80%
Improved Cornering & Maneuverability

40%
Shorter Braking Distance

50%
Reduction in Vehicle Wear and Tear

WATER TRUCK CHASSIS-MOUNT MODULES

AquaModule™

TTi offers remote supply modules, which is the perfect solution if you have the desire to do your own 'fit-off' of a complete water cart module.

Design, fabrication and testing of steel componentry is all completed in house, before being hot-dip galvanised ready for final assembly.

The module is then fully assembled and tested one of our state-of-the-art facilities, ready for sign off and mounting to the truck of your choice.
